

Creating Sample Sheets

The sample sheet generator is a convenient way for you to create professional presentation sheets for your buyers. You can print them out to bring to appointments and share them digitally to your buyer's access point. Sample sheets include pricing, product info, labels and any custom notes you want to include.

1. Create a new Sample Sheet from the Presentations tab by selecting the date of your next appointment.

2. Tag the accounts where you'll be presenting these samples. This will create a record of what you presented to each customer and share sample sheets digitally before or after your appointments.

Denyse Louis, the "Louis" in Louis/Dressner, knows the Mâconnais well. Denyse Louis' family comes from this area, has vineyards with the co-op in Lungy, and they own a home there. It was a 1986 Mâcon from a small artisan estate that was the revelation and the start for their search for comparable wines from other regions. Louis/Dressner takes special pride in their selections from the Mâconnais.

Reviews:

"Trim and pure, this is focused on white peach, tangerine and honeysuckle, ending with a push of delicate lemony citrus.

Drink now through 2018. 2,909 cases made."

On the occasion of the 120th anniversary of the House of Cocchi, we have resumed production of Giulio Cocchi's original recipe Vermouth di Torino, previously produced in 1891. This Storico Vermouth di Torino adheres to a long if seldom followed tradition, notably in the selection of its fine wine Moscato of local origin, the botanic formulation and production in the historic Asti region, outside Torino.
